

SKID FOR SANDSTORM MEDIA FILTERS

DATE: May 2020
NAME: Dror Negbi
POSITION: Product manager

DESCRIPTION

As part of the continues development process of our filtration solutions, I am pleased to announce the new SKID FOR SANDSTORM SYSTEMS, the skids fit to 2 tanks 20" and 24" double chamber tanks and to 3 tanks 20" and 24" double chamber tanks and allows installation flexibility, mobility and simplicity. The skids were designed to in the same modular concept and will allow to mount the Sandstorm system on them in very easy way and to transport the systems from one location to another, moreover the skids were designed to carry the complete system weight including the sand and with adjustable legs

APPLICATION

Sites without concrete floor, mobile systems, installation flexibility

SPECIFICATIONS AND RECOMMENDATIONS

Current version exists for 20" and 24" double chamber tanks, soon we will launch the skids for 30" and 36" too

Having the skids on stock will allow us to better serve different demands from our dealers/end users
